# MEGASTACK

## SPECIAL AMPLIFICATION SYSTEM

Introducing the newly-armed and fully-loaded Dave Mustaine MG15FXMSDM – codenamed **Megastack**. Commissioned especially for the Megadeth frontman himself, this menacing addition to Marshall's revolutionary MG Series will be sure to strike fear into the hearts and minds of grown-ups everywhere. Featuring four channels, custom-voiced FX, immense programmability and a pure Marshall tone payload, the Megastack packs a huge sonic punch.

### SPECIAL AMPLIFICATION SYSTEM

Contained within the MG15FXMSDM is a vast stockpile of analogue Marshall tones, caged in a massive arsenal of four unique channels. Clean, Crunch, OD1 and OD2 are the channels in question and are all accessible through either the front panel or the revolutionary MG Footcontroller\*. The Megastack also packs an incredible array of custom-voiced and totally adjustable digital FX – Chorus, Phaser, Flanger and Delay – all loaded into just one front panel control. Each effect is gradually adjusted as the control turns through its section, making it possible to create the exact effect you want at the mere turn of a dial. You can precisely dictate the length of the Delay by using the trusty Tap button. Simply pushing this button twice to your desired 'echo timing' will set the required tempo. Separate to these key effects is a standalone Reverb control, perfect for adding space and depth to your tone.

Straight out of the box you'll find that each channel has been programmed by Dave and producer Andy Sneap to deliver four awesome Mustaine tones – Clean Absolution, Symphony Chorus, New Wave of British Heavy Metal and Holy Solo. Each channel is, of course, completely adaptable just like a normal amplifier, but here's where the MG Series obliterates the competition – all that analogue tone and all your settings can be programmed directly to that channel's memory. Immediate recall of your favourite Marshall/Mustaine sounds and FX just got a whole lot simpler, especially when using the optional Stompware™ enabled MG Footcontroller\*.

### FOOT SOLDIERS

By its very nature the MG Footcontroller\* is totally programmable, with each of its four footswitches assignable to any front panel switch, preset channel and/or built-in Tuner. A simple LED panel lets you know exactly what features and channels are engaged, while the digital display indicates the currently selected footswitch. When using the Tuner function the digital display shows the closest current note being played, while the LED panel is used to fine tune that note perfectly. The intuitive Tuner function automatically mutes the speaker output(s) until another footswitch is pressed, returning you to the previous channel. All that is needed to connect footcontroller and Megastack is a good quality guitar lead, making expensive and restrictive multi-pinned cables obsolete. Investing in this incredible unit also unlocks an additional four Mustaine/Sneap programmed tones – Wish You Were Clean, Mega Rhythm, Conjuring Solo and Hanger Solo!

### SILENT RUNNING

If the idea of jamming along with your favourite MP3, CD or the metal maestro himself appeals to you, then the MP3/Line In input is a real bonus. Simply connect the Line Out or Headphone socket of your music player here, adjusting its volume accordingly. Combine this with the use of headphones, which automatically mutes the speaker cabs, and you have a stealthy way to hone those killer riffs before full live deployment!

### BODY ARMOUR

Created in the same guise as the mighty 1960DM Dave Mustaine signature cabinets, the Megastack's robust construction is wrapped in carbon-fibre-effect vinyl with diamond-stamped kick grilles shielding the two 1x10" speaker cabs. Impact-resistant corner guards further protect the Megastack from accidental damage.

### END GAME

As you can see, the sheer versatility of the MG15FXMSDM ensures every tonal box is ticked and all sonic bases are covered. If you've been searching for that perfect all-round practice amp, one with astounding tone, essential features and 'bomb-proof' looks, then look no further than the Megastack.

\* Optional 4-way programmable footcontroller (PEDL-90008) utilising Marshall's patented Stompware™ footswitching technology. Sold separately.

I WOULD LIKE TO INTRODUCE TO YOU THE NEWEST MARSHALL STACK,  
THE MEGASTACK! AND THIS LITTLE STACK CAN KICK STACKS OF ASS!!

Dave Mustaine

AS YOU WAIT FOR THE POLICE TO COME VISIT YOU FOR DISTURBING THE  
PEACE JUST REMEMBER... IT AIN'T HOW BIG YOUR PENCIL IS... IT'S HOW YOU WRITE  
YOUR NAME!
